

# Public key infrastructure

## Screenshots

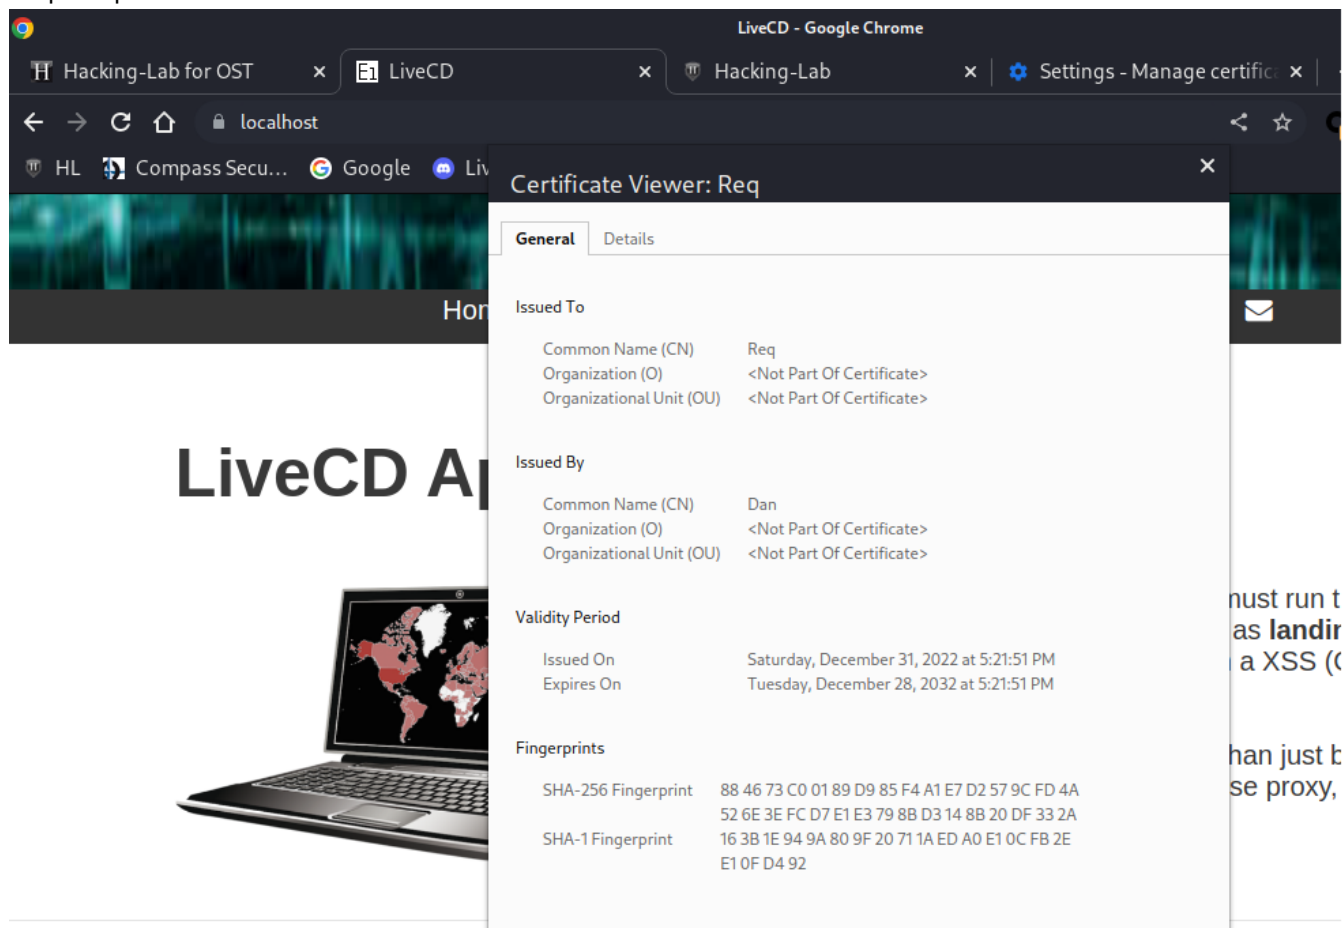

### Step 6 running apache

Step 7 import CA

## Step 8 Updated certificate with SAN

## Notes and varia

Step 5 Configure certs with Apache: entered the password upon restart, did NOT execute `./easysrsa set-rsa-pass localhost nopass`

Root CA (Step 2, Init PKI):

- PEM pass phrase: Dan123
- CommonName: Dan

Localhost server cert

- PEM pass phrase: Req123
- Common name: Req

Client cert ( abusing the email as I am semiblindly following the steps: cyrill.brunschwiler@compass-security.com)

- Cyr123
- Common name: Cyr
